

NEW - Airport Runway Condition Reporting (FICON)

Please join us for an informational and discussion on how we now report the airfield conditions, what this information means, and how it will affect your aircraft operations. We will present the new reporting system and have open discussion regarding this change.

As the temperatures drop and the precipitation changes from a liquid to a solid state, you as the PIC must make the final decision to take-off or land based upon runway conditions reported to you.

Come out and get informed.

Directions: Lane Aviation is located on the right side as you drive toward the terminal on International Gateway. Turn right into Lane Aviation entrance, bear to right of flag pole, enter building with maroon awning (4387) over the door, up the stairs to second floor, room on the left.

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
